

Hemendra Roy

Full-Stack Developer

hemendraroy04@gmail.com | 8851434466 | <https://www.linkedin.com/in/hemendra-roy-b22624287/>
C-183, Street No.15, Khajoori Khas, Delhi-110094

SUMMARY

Full-Stack Developer experienced in building scalable web and mobile applications using Spring Boot, React, and React Native (Expo). Proficient in REST API development, backend integration, and database management with Supabase and Neon (PostgreSQL). Built real-time solutions, including a BLE-based attendance system for automated student tracking. Founder and developer of Serenic, an online platform for retro games, emulators, and modding tools, featuring searchable downloads and ad-driven revenue generation. Extremely strong understanding of Data Structures and Algorithms, with a passion for developing efficient, scalable and user-centric software solutions.

EDUCATION

Bachelor of Technology in Computer Science and Engineering 2023-Present
Maharaja Agrasen Institute of Technology (Delhi)
CGPA (upto Semester 4): 8.62

SKILLS

Languages: Python, C, C++, Java, JavaScript, TypeScript
Frontend & Mobile: React.js, React Native, HTML5, CSS3
Backend: Spring Boot, Express.js, Node.js, REST APIs
Databases/Backend Services: Cloud Databases (NeonDB, Supabase), MySQL, Database Design, SQL, MongoDB
Deployment & Tools: GitHub, Git, Postman, Render, Vercel, Domain & DNS Configuration

PROJECTS

Online Retro Games Catalogue (Serenic)

React.js • TypeScript • Vercel Deployment • MongoDB • Express.js

Created and maintained a community-powered platform for retro games and emulator downloads, offering searchable content discovery and download services. Established an ad-supported revenue model with earnings of approximately ₹0.91 per download. This website gets around 100 visitors daily.
www.serenic.xyz

E commerce Website (ShopStorm)

React.js • TypeScript • Spring Framework • REST API • Render Deployment • NeonDB

A role-based(seller/buyer) full-stack web application with a common Spring Boot REST API backend and two separate React frontends for buyers and sellers. The seller side supports product listing and management, while the buyer side provides product browsing, cart, and ordering features.

BLE Based Attendance Mobile Application (Attendify)

ReactNative (Expo) • Supabase • Low Level Design

Developed a Bluetooth-based attendance system to prevent proxy marking and eliminate manual attendance, improving time efficiency. Integrated Supabase as the backend to securely store, manage, and retrieve attendance records.
